

## Getting Started

[ohow.mymedreg.com](http://ohow.mymedreg.com)

code: preop

As the nurses of the Orthopaedic Hospital of Wisconsin, we look forward to starting the process for your upcoming visit. The first step for us will be to learn more about your current health. We do this through a secure website that you can access at your convenience from your home or work any time of day or night. Access is at [ohow.mymedreg.com](http://ohow.mymedreg.com) (type this into your browser's URL or address bar, not the Google search bar). At the question '**Please enter code**' type **preop** then you're ready to begin entering information. **If you procedure date is within the next 7 days, please log in this afternoon or tonight.** If further in the future, complete at your convenience in the next few days.

If you are a minor, we ask that your parents do this. If you are older or without computer access, you can ask an adult child, relative, or other close person to help you. Most libraries also have free internet access. If you have no ability to enter the information due to physical impairment or lack of access, don't worry. One of us will work with you to get the information another way.

This initial step will take five to twenty minutes depending on your current health. In the days before your surgery, we will then follow-up with a phone call to review your information.

We look forward to making this the start of the best hospital care you have ever experienced.

Susie, Molly, Anne, Susan, Diane  
and the rest of the pre-admission staff
